

Disciplines with the highest and lowest median salary growth of assistant professors: 2010-2014

ASEE conducts an annual faculty salary survey. A previous databyte (November 2012), showed all ranks of faculty experienced salary growth from 2007 to 2012, with full professors experiencing the greatest growth in salaries; assistant professors experiencing the least salary gains. This databyte looks at the salaries of assistant professors and presents the disciplines of assistant professors with the highest and lowest median salary growth from 2010 to 2014 as well as their interquartile ranges.
