# GROWTH IN FEMALE FACULTT: NUMBERSAND PERCENTAGES 

he total number of female faculty members in engineering more than doubled between 2004 and 2018 as colleges and But the number of men surged as well. As a But ne number or men surged as well. As a
result, the proportion of women within the total engineering faculty population grew by only 7.3 percentage points, maintaining an overwhelming male majority. During that 14 -year period, the percentage of female assistant professors increased from 17.8 percent in 2004 to 25 percent in 2018; female associate professors increased from 12.3 percent to 20.2 percent, and female full
professors increased from 5.8 percent to 12.1 professors increased from 5.8 percent to 12.1 percentine 2018. Masters level institutions had
the largest increase from 2004 to 2018 ( 8.6 percent), followed by baccalaureate colleges ( 8.0 percent), and doctoral universities ( 7.2 percent). The past five years have seen a decrease in the total number of associate professors, and the total number of full professors has remained flat, limiting women's opportunities for promotion.
